John
Dear Mr. Hatmaker:

With this letter I am approving the report entitled **Final Ground Water Monitoring Network Evaluation for the Kerr-McGee Chemical Corporation Superfund Site Tronox Facility Soda Springs, Idaho** dated October 30, 2010 and transmitted to EPA with your letter dated November 1, 2010.

This report satisfies the requirements of Task 3.3 and Task 4.3 of Addendum 1 to the Statement of Work of Remedial Design/Remedial Action Consent Decree for Kerr-McGee Superfund Site (Addendum). The Addendum requires Tronox to conduct an evaluation of the current groundwater monitoring network at the Kerr-McGee Superfund Site and develop a report documenting the findings of that evaluation.

Please feel free to contact me with any questions.

Sincerely,

William M. Ryan
William M. Ryan
Remedial Project Manager
